daxara 218.2 trailer

Description

The Daxara 218.2 Trailer is the first Daxara trailer with a usable space that exceed 6ft x 4ft and still features the reinforced 'A' frame drawbar and 13 inch wheels. It is constructed from galvanised steel for strength and longevity and has a gross weight capacity of 750kg.

The reinforced 'A' frame and double skin panels further increase the robustness of the trailer and make it durable enough for more regular commercial use. As with all the Daxara trailers the rear panel/tailgate is removable and along with the tipping feature allows for easier unloading of materials such as sand, gravel and earth. In addition to this the front panel opens and can also be removed on the Daxara 218.2 trailer.

Another useful feature is the recessed lights on the back of the trailer which help protect the lights from getting knocked and damaged.

The versatility of this great trailer can be further enhanced by adding any of the accessories shown below. Buying a spare wheel and spare wheel support should be seriously considered when buying a trailer, especially if you intend to use the trailer on long journeys.

Specification

Field	Detail
Model Code	Daxara 218.2
Material	Galvanised Steel
Internal Length (mm) - (ft in)	2050 - 6' 9"
